

Datasheet

TRANSMITTERS/ TX26-M1 - Main supply transmitter

Product description

The TX26-M1 is a discreet triggered transmitter that emits a RF radio signal when 240Vac is applied and continues for the duration of the supply for up to 25 seconds.

At the end of this period the RF signal terminates and a new transmission will be made when 240Vac is re-applied.

Each product is powered with a changeable battery.

Key features

- Discreet triggered transmitter
- 1 channel
- 150 to 200 range in open field
- RF radio signal

 *Certification*

 *DEEE*

RoHS *Certification*

 *IP2X*

 *-20°C to 70°C*

Product Information

Frequency: 433.92MHz

Modulation: ASK

Coding: Rolling Code Keeloq®

Range: 150 to 200 in open field

Channel: 1

Electrical specifications

Supply: 230Vac
