

SHL-1200 Shearlock

The SHL-1200 shearlocks are part of our family of electronic locking devices. These units are ideal for traditional single action doors (one way opening), or for double action doors (swing-through) providing the door closers are of a good standard.

They provide discreet high security locking with the minimum of fuss. The shearlocks have a holding force up to 1200kg, and include lock status monitoring as standard. Additionally, they will accept free voltage of 12 to 48vdc.

A full range of accessories are available to enable the shearlocks to be fitted to most doors, even glass.

Specification

Finish:	Stainless Steel, Coated
Voltage:	12-48vdc
Working Current:	630mA @ 12Vdc, 315mA @ 24Vdc
In-Rush Current:	2.1A @ 12Vdc, 1.05A @ 24Vdc
Dimensions:	268 x 30 x 35mm (l x w x d)
