

STAR1M

The STAR1M from CDVI is a mullion MIFARE card reader.

Designed on our award winning STAR reader, the new STAR1M offers both standalone or a Wiegand MiFare reader in one product. It can be used with the Atrium and Centaur access control systems.

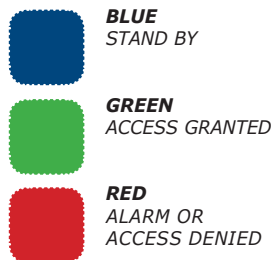

As with the other readers from the range, the STAR1M gives an anytime status of the door through multi-coloured LED's.

The STAR1M is also a MIFARE vandal proof reader. Its innovative design and compact size make the STAR1M ideal for many environments: hotels, offices, residential buildings...
