

WR Series

NEW

The WR-T2GE12 is a newly available CDVI product. It was designed for special installations where waterproof and dustproof features are required, such as outside installations and sterile environments.

It features a protected gasket seal and has a holding force over 400kg measured at the jaw.

The WR-T2GE12 also features a manual hold-open function and built-in MOV, offering a unique product for external pedestrian gates.

Overview

- Weatherproof and Dustproof IP65
- Gasket sealed
- Manual hold-open function
- Mortice installation
- Handed - right or left
- CC version available
- Built-in MOV (metal oxide varistor)
- Holding force: 400kg
- Cycle tested to 300,000 operations

WR Series - Technical Specifications

Product Specifications

Weatherproof IP65
Dustproof IP65
Mortice installation
Handed - right or left
CC version as standard
Built-in MOV (metal oxide varistor)
Holding force: 400kg
Cycle tested to 300,000 operations

Electrical Specifications

Power input: 12Vdc
Consumption: 180mA

Dimensions

Dimensions: 100 x 21,5 x 37mm
Environment: -15°C to +40°C
