ACCESSORIES/ GF45 - Traditional Door Loop

Product description

The range of door loops from CDVI offer a safe and secure method of transferring cables from a fixed point, such as door frame onto the door leaf.

All models have a metal loop for better protection, and all have a minimum internal diameter of 7mm which is sufficient to handle the most common cables used in door locking/control.

The GF45 is the traditional door loop, square aluminium ends with 4 fixing holes per end. This model is still the most widely used in the market.

Key features

- 45cm length
- Cable/power management
- Easy to install
- 9mm internal diameter
- Economical and vandal resistant
